Title

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MIAMI GARDENS, FLORIDA, AUTHORIZING THE CITY MANAGER TO ISSUE A PURCHASE ORDER IN THE AMOUNT OF \$69,958.42 TO BOBCAT OF METRO DADE FOR THE PURCHASE OF AN ALL WHEEL STEER LOADER; PROVIDING FOR THE ADOPTION OF REPRESENTATIONS; PROVIDING AN EFFECTIVE DATE.

Staff Summary

Background

The City Council approved a line of credit to purchase new and replacement vehicles and heavy equipment for the City departments. One of the equipment listed included a Parks Department requirement for a piece of equipment which is capable of mowing, trenching for irrigation, spreading fertilizer etc. that will not damage the turf while in operation. An all wheel steer is capable of all of the functions and allows the equipment to maneuver on the field without damaging the turf.

Analysis:

Staff prepared the specifications to purchase equipment capable of the required needs and functions and advertised on November 9, 2007. A broadcast notice was sent to 126 vendors. Eleven vendors requested bid packages. The bids were opened on November 29, 2007. Two bids were received and publicity read. A copy of the bid document and submittals are available at the assistant to the mayor and council's office for review. The tabulation sheet is attached as **Exhibit "A"**.

K-10) CONSENT AGENDA

Issue Purchase Order for purchase of an
All Wheel Steer Loader

The apparent low bid was evaluated for compliance with the specifications, their equipment is not an "all wheel" and therefore non-responsive. The second bid was also evaluated for compliance with the specifications and the ability of the equipment to perform the required work without damaging the fields. The equipment met all requirements.

Recommendation:

That the City Council approve the attached resolution authorizing the City Manager to issue a purchase order to Bobcat of Metro Dade, located in Hialeah Gardens, Florida, in an amount of \$69,958.42 which includes the extended warranty.

Why are Bobcat All Wheel Steer Loaders Unique?

Two Different Steering Modes To Match Your Job!

Go from four-wheel "all wheel" steer to skid-steer mode with the flip of a switch!

All-Wheel Steer Mode

The new Bobcat all-wheel steer loader is a revolutionary compact loader with four steerable axles. That means less tire wear, less ground disturbance and less operator fatigue.

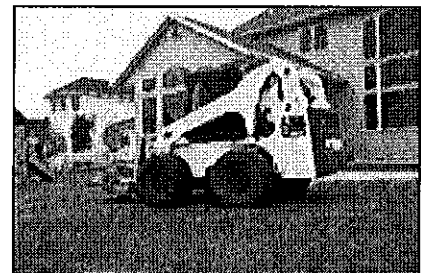

Skid-Steer Mode

Flip a switch, and the loader gives you all the advantages of a compact skid-steer loader. It can maneuver in tight spaces, turn within its own length and deliver high performance day in and day out.

Steering Mode Selector Switch

Conveniently located within easy reach from the operator seat, the steering mode selector switch is found on the dash panel inside the cab. The steering mode selector switch makes switching steering modes quick and easy. Depending on job requirements, the operator can change steering modes from all-wheel steer to skid-steer simply by bringing the loader to a stop, pressing the steering mode selector switch, and then the "Press to Operate Loader" button. Now he's ready to operate in skid-steer mode. Changing back to the all-wheel steer mode can be done in the same way.

Tire & Turf Friendly

All-wheel steer mode is gentle on grass and other surfaces, meaning little or no rework after the main job is done.
